

Job description – Insolight SA	
Title:	Production & Process Manager

Overview:

Insolight is a start-up working in the field of solar energy harvesting and illumination applications. The company core technology is an innovative solar panel with record efficiency (for more information, please check our website www.insolight.ch). The company is backed by several private investors and public grants.

Insolight is currently designing the industrial equipment to assemble our solar panels. The involved processes are:

- Parallel assembly (pick-and-place)
- Gluing & lamination
- Mechanical assembly
- Molding (PMMA & silicone)

We are looking for a person that is highly motivated to work in a fast-paced start-up environment. You would be working in a dynamic and passionate team on the EPFL campus.

Objectives:

We are currently seeking a Production & Process Manager for the following activities:

- **Project management:** Coordinate multiple partners during the design and build-up of our first assembly equipment
- **Assembly plan:** Provide guidelines on the assembly plan, define industrial methods & processes and analyse materials flow
- **Quality management:** Define and manage the quality control and process optimization of various production parameters (repeatability, throughput, yield, ...)

Knowledge/skills required:

- Several years of experience in a production environment
- Experience with pick-and-place machines
- Experience with industrial glues and adhesives
- Experience in coordinating multiple industrial partners
- Experience in quality control
- Experience with automated manufacturing lines is a plus

Conditions: to be discussed.
